*Cypripedium parviflorum*, Salisb.  
*Abourea villosa*, Nutt.  
*Dillenia angustifolia*, Nutt.  
*Platanus Americana*, Mo. (the <sup>triacun</sup> <sup>comes from</sup>)  
*E. triandra*, Schk.  
*Microplitis breviflora*, Gray

Dear Dr. Gray,  
 As you have been re-  
 viewing the Synoptical Flora  
 I thought I had better send  
 a list of plants of the orders  
 therein ~~mentioned~~ comprised col-  
 lected by Tweedy in Yellowstone Park  
 this year - together with a few  
 others of interest not described  
 in the Flora. If any occur  
 excite your attention and you  
 desire it let me send you  
 the specimens (generally single).  
 Some I shall probably send  
 at any rate. There are others  
 yet to be examined.  
 Very truly,  
 J. M. Coulter
